DETAILED ACTION

Examiner Amendment

An examiner's amendment to the record appears below. Should the changes and/or additions be unacceptable to applicant, an amendment may be filed as provided by 37 CFR 1.312. To ensure consideration of such an amendment, it MUST be submitted no later than the payment of the issue fee.

Authorization for this examiner's amendment was given in a telephone interview with Eric J. Franklin on 02/25/2011.

Regarding **claim 5**, the application has been amended as follows:

Claim 5. A method for voltage stabilization of an electrical power network system comprising a producing power network system side and a consuming power network side comprising a transformer, a power transmission line with an impedance (ZLN) connected to a primary side of the transformer, a transformer a power load connected to a secondary side of the transformer, and an on-line tap changer added to the transformer, wherein a transformer ratio n is controlled through the on-line tap changer trying to keep the voltage (V2) on the secondary side of the transformer at a voltage reference (Vref) the method comprising: measuring the impedance of the line in case of dynamic instabilities; and changing the controlling a transformer ratio n by changing a voltage reference (Vref) of the on-line tap changer, according to a feed forward compensation from the impedance of the line.

Allowable Subject Matter

Claims 5-8 are allowed. The following is a statement of reasons for the indication of allowable subject matter:

Regarding **claim 5**, the prior art of record fails to teach or suggest the required “wherein a transformer ratio n is controlled through the on-line tap changer trying to keep the voltage (V_2) on the secondary side of the transformer at a voltage reference (V_{ref}) the method comprising: measuring the impedance of the line in case of dynamic instabilities; and changing the controlling a transformer ratio n by changing a voltage reference (V_{ref}) of the on-line tap changer, according to a feed forward compensation from the impedance of the line” limitations of claim 1 (wherein claims 6-8 are depending upon claim 5, thus allowed).

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled ‘Comments on Statement of Reasons for Allowance.’

Conclusion

Any inquiry concerning this communication or earlier communications from the examiner should be directed to NUSRAT J. QUDDUS whose telephone number is (571)270-7921. The examiner can normally be reached on M-Th, 5:30am-3:30pm.
